### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Sloan on September 5, 2007.

The application has been amended as follows: claim 26 has been canceled.

The following is an examiner's statement of reasons for allowance: references by Guo et al. (U.S. Patent No. 6,961,058) and Higashiyama (U.S. Patent No. 6,897,865) are made of record as describing related methods of determining illumination of surface points of an object in a scene from lighting sources and rendering shadows with density, respectively. However, none of the cited prior art teaches or suggests a first thickness map including a plurality of rays from the first lighting source, each thickness function representing thickness values of the object with respect to distance from the first lighting source along the respective ray.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Yang whose telephone number is (571) 272-5514. The examiner can normally be reached on 8:30-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Zimmerman can be reached on (571) 272-7653. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
